of

HE Hearth, which is about Five Foot high, is for laying the Wood on a and the Space which from the Grate to the Dome is about Seven Foot, ferves to contain the Pieces of the three Sorts of Stone abovementioned. Those of the First, which are about the Size of

our rough Stones, are put im-intely upon the Hearth, which is of Brick, by a lar which opens afide of this Hearth; those of the fird, which are somewhat less, are thrust into the lars over the former; and lastly, those of the Second, nich cannot be put in by the Door of the Grate, are need by the Aperture of the Dome. And in regard the last are the smallest, by reason their Vein easily inks, they mix them up with Clay, and form a Sort d'square Loaves, which are to be dried before they are

The Furnace being thus filled within a Foot and half, nich is left for the Vapour to circulate by, and the mich is left for the Vapour to circulate by, and the hor of the Grate, as well as the Dome, being closed with Brick, they light a Wood Fire on the Hearth, the lacke whereof goes out by a Tube contrived in the nickness of the Wall, and continued like a Chimney

mor three Feet beyond the Ridge of the Building.

The hind Part of the Furnace, which is that oppointo the Aperture of the Hearth, refts, all but a Foot whilf of its Height, against a Terras : And this Part slich exceeds the Terras, is pierced in its whole Com-pa with 16 Spiracles, each Seven Inches in Diameter, at rais'd in the fame Horizontal Line. This Terras, al rais'd in the lame Horizontal Line. This terrasy sich is only Five Fathoms long, is terminated by and little Building which faces the bind Part of the funces; and its Floor being paved, descends on each \$2, by which it touches those opposite Buildings in a say Declivity, which forms a Gutter in the middle this Space.

The Use of this Terras is to fustain several Aludels, which pierced at both Ends; they are half

staten Vessels, pierced at both Ends; they are half the in Diameter, and two Feet long; and from the is mades of the two Furnaces, to the fame Number of lawares made in the Foot of the Front Wall of the int biking opposite to these Furnaces, form Lines of Commication like large Strings of Beads.

By means of these Aludels, the Sulphurs and mercu-

in Vapours raised from the Ore by a violent Fire, or 14 Hours, are conveyed to this little op-Tubes which open therein, till they have deposited their haver Parts, which are the Mercury revivified in these

They let the Furnaces cool for three Days, after which the Aludels are unluted, and the Mercury poured of them into a square Chamber, whose Sides run slope, and terminate in a little Ciftern placed in the Middle thereof.

In running from the Extremities of this Chamber into the Ciftern, the Mercury purges itself of a black Duff, which is left sticking to the Bottom of the Chamber, to be swept away by the Women from time to

The Use of the Gutter in the Terras, is to collect all the Mercury which might have escaped thro' the luting of the Aludels, and upon the ftirring and fhifting them.

And the four Chambers into which the little Building that terminates the Terras is diffributed, ferve as fo many Receivers, where the Smoke, by the Stay it makes there, deposits still more Mercury; which they find here, as well as in the Aludels. There is an Entrance into each of these Chambers by a Window, which they close very exactly with luted Bricks in the Time of the Ope-

The Quantity of Mercury which one Furnace full of Pieces of the Three Kinds of this Ore will afford by e Coction, is very confiderable, amounting, at leaft, to 25 Quintals, sometimes to 30, and sometimes even

to 60 Quintals of revivified Mercury.

The Mercury produced at each Coction, is carried into a Magazine built in the fame Inclosure, where it is into a Magazine built in the fame Inclosure, where it is preferved in Sheep Skin Bags, fuspended over earthen Veffels, till they fend it to Mexico. In the Year 1717, there were a5,000 Quintals of this Mineral remaining in the Magazine, after a much greater Quantity thereof had been fent to Seville.

After this, I might subjoin several Explanations upon the Quality of different Kinds of Cinnabar, treated of by Pliny, Lib. 33, Cap. 7, and shew that the Cinnabar

Mise in Spain, whereof he fays that the Ramess were fo jealous, that they yearly transported 10,000 Weight of its Ore to Rome, to be prepared by themselves, and employed in their Paints and Fuens's, was the same with that of Almaden; which I might confirm, not only from the Grain and Red Colour of this Ore, which sill are the Grain and Red Colour of this Ore, which fill answers to Pliny's Description, but from the Si-tuation of the Place, which he mentions to be in the Batica, and the schual Tradition of the Country: But I chuse rather to be producing Observations, than entering upon Discussions.

The First, which to me appears equally useful and simple, is their Method of proving whether a Stone contains Mercury or not, and in what Quantity. To this End they chuse a Stone, which, by its Weight and Colour, seems to have Mercury in it; and heating a Piece of it Red-hot, when it appears covered with a bluish Flame, withdraw it again, and place it under a Kind of Bell Glass, through which they observe the Funce that exhale from it; and if they condense, and gather into little silver'd Drops, which bang to the Sides of the Glass, or drop down, they are sure it contains Mcr-

By this Experiment, I was led to another easier one, for discovering any suspected Sophistication in a Piece of Cinnabar; which is, by pulverizing it, land casting the Powder upon a burning Coal, the Colour of the Flame will discover either the Purity of the Mineral, or the Quality of the Foreign Body mix'd with it: For if it be pure, the Flame will appear thicker, and of a blue Colour, bordering on Violet, without almost any Taste; whereas if the Flame border on Red, it will be an Indication that the Cinnabar has been adulterated with Red Lead: If it exhibits a Sort of boiling, join'd with an odorous Fume, it is a Proof of the Admixture of Sanguis Draconis therewith.

[To be concluded on the next Vacancy of News.]

### FOREIGN PORT.

Elseneur, June 19. The following Commanders are arrived; viz. the Govert, Rous, from Newcastle for Malmore; the David. Wardropen, from Dundee for Riga; the John, Liutkens, from Stockholm for Newcaltle ; the Jacob, Hales, and the Samuel, Turner, from Riga for London; the Gerit, Hesels from Dantzick for London; the Nicholas, Spencer, from Riga for Lon-don; the Richard, Hails, from Riga for London; the John, Green, from Riga to Hull; the Francis, Allaley, from Riga for London; the John, Scourfield, from Riga for Newcastle; the Hanns, Roos, from North Koping for London.

#### HOMEPORTS.

Dover, June 19. Wind S. Arriv'd the Mary and Su fanna, Purches, in 36 Days from Leghorn ; also arriv'd the Eagle Privateer, Bazely, from a Cruize; and has fent in here a Cutter belonging to Hastings. 'He took her going into Boulogne with Money on board, to purchase a Cargo in order to smuggle it to England. This shameful pernicious Trade is carried on between those Parts and France as much, if not more, than before War was declared against the French. Yesterday failed the Jane, Broad, for Cork; the Endeavour, Anderson, for Dartmouth; and several Coasters bound West-

Deal, June 19. Wind S. W. by W. Remain his Majefty's Ships Duke, Shoreham, and Falcon Sloop, with the Outward-bound as per laft. Laft Night failed the Fox and Swift Privateers on a Cruize. Came down the Charming Molly, Mildrum, for Falmouth.

Arrived, At Portsmouth, the Barfteur Man of War, Caprain Mitchell, the Chichefter Man of War, the Portim uth and Princess Royal Storeships, and the Hitchenbrook Sloop from the Streights: They left Admiral Rowley the 4th of June, cruizing in the Streights. A Xebeck and a Bargolongo telonging to his Squadron, had taken a very rich French Turky Ship just before these Ships left him.

## LONDON.

His Electoral Highness of Mentz has ordered his Minifters at the Courts of Vienna and London, as well as at the Hague, to declare in his Name, that nothing can fright him from his Purpole, or hinder him from taking the fhortest and most effectual Methods for restoring the Diguity and Independency of the Empire, and perform-

ing his Treaties punctually.
Field-Marshal Seckendorff, who was gone to Augsbourg, in order to have put the Troops of the affociated Circles into Motion, has had the Mortification to find the Defeat of Freydberg has entirely disconcerted his De-fign, and overturned that Spirit he had raised for refloring the Liberty of Germany, the Circles refuling to

upon an Application of the Prince of Waldeck to the States General, for Orders, in respect to a Proposition made in the last Council of War; he was answered, that Hungary and Great Britain were Principals, Holland only an Auxiliary; and that therefore he was to execute whatever his Royal Highnels and Count Koniglegg thought reasonable.

On the Audrian Troops levying heavy Contributions in the Country of Heffe, Prince William has quite altered his Language, feems to look upon his Character and Conduct at Stake; and has intimated, that whatever Thoughts he might have of closing with the Propositions made him by the Maritime Powers, these were not the Methods which would induce him to take such Resolution.

It is faid, that the Pruffian and Palatine Minifters at Franckfort have frequently private Meetings; in which it is believed, the Project of a Manifello, or Protest against the ensuing Election, is under Consideration, and that the Apprehension of this, occasions great Vaeafiness to the other Members of the Dyet.

They write from Briftol, that the Gertrude, B.II, from

Briftol for A de, is taken by a French Privateer, but don't fay where.

The Emanuel, Borgeson, from Gottenburg for Bourdeaux, is lost on the Caskets; but the People, with Dis-

ficulty, were fived.

This Week Charles Crawley, Efq. of Brentwood in Effex, was marrid to Mils Anne Jones of Waltham-

Next Thursday the Short-Allowance Money due to the Companies of his Majesty's Ships the Rochester, Augusta, Blanford, Eltham, Ipswich, and Loo, will be re-

call'd at the Pay-Office in Broadstreet.

The Books of his Majesty's Ships the Rippon and Montague are sent from the Pay-Office; the former for Portfmouth, and the latter for Pymouth & for the Payment of their Companies to the 30th of June,

1743. On Tuesday died, aged 86, at her House in Gough Square, Mrs. Margaret Lane, a Widow Gentlewoman of

Last Wednesday Cap'. Congreve, Commander of the Onflow, bound for Chins, took Leave of the Court of Directors of the India Company, in order to pro-

ceed on his intended Voyage.

Yesterday Crisp Gascoign, Esq. Citizen and Brewer,
was chosen Alderman of Vintry Ward, in the room of
Edward Gibbon, Esq. who has defir'd Leave to resign

Last Wednesday Night, about Eight o'Clock, a Fire broke out at the Still House of Mr. Scott, at Millbank, Westminster, occasioned by the Head of the Still slying off, which did considerable Damage to the faid House, but by timely Affiftance, was happily extinguished with-

out spreading any farther.

The Right Hon, the Lord Chancellor has presented the Rev. Mr. Thomas Bright to the Rectory of Rushe-den, in the County of Northampton.

Thomas Styles, Elq, Son of Sir Thomas Styles, Bart. Page of Honour to his Royal Highness the Duke of Cumberland, is appointed an Enlign in she First Regiment of Foot Guards.

And — Wheeler, Gent. is appointed a Lieute-tenant in the Third Registent of Foot Guards.

Last Wednesday several Officers arrived here from the Army in Fanders.

The fame Day the only Son of Mr. Welch (a Lad about 17 Years of Age) who keeps the Goar Alehouse in German-street, St. James's, was unfortunately drown'd near the new Bridge at Westminster, supposed to be drawn into a Ballest Hole 18 Feet deep.

WHereas several Persons have lately resorted to Bath, under Pretence that they were to be admitsed into the General Hospital there, and have thereby been a common Nuisance to the said City: This is to acquaint all Persons, that no Application will be received, unless the Person be at his usual Place of Abode when such Application is made.

No Letters will be received unless Post paid. By Order of the Profident and Governors,

E. BRETT, Regifter.

MARSHALL Mayor.

A Common-Council holden in the Chamber of the Guildhall of the City of London, on Wednesday the 19th Day of June, 1745, and in the 19th Year of the Reign of our Sovereign Lord George the Second, King of Great Britain, &c.

IT is agreed and ordered by this Court, That if any Person who hath been nominated to be Sheriff of this City and County of Middlefex, in pursuance of an Act of Common-Council made the 22d of October, 1703, Shall, on or before Saturday the 22d Instant, at Six of the Clock in the Evening, pay into the Chamber of London, for the Use of this City, the Sum of Four hundred Pounds, pur-fuant to the said Ad, and also Twenty Marks more, towards the Maintainance of the Ministers of the several Prisons of this City, according to another Act of Common-Council made the 3d of December, 1650 and the usual Fees; every such Person shall be exempted from being eligible to the said Office of Sheriff of this City and County of Middlesex for ever hereafter, unless such Person shall at any time take upon him the Office of an Alder-man of this City, then, and in such Case, he shall be liable to be elected into the said Office of Sheriff, as if this Order had never been made.

MAN.

New Cross TURNPIKE.

HE Trustees for repairing the Roads from the Stones-end in Kent freet, and Bermondsey in Southwark, to Southend and Dartford, Oc, in the County of Kent, do hereby give Notice, that on Saturday the 29th of June Inft. at the Bowling-green House on Black-heath, by Nine o'Clock in the Forencon, they will lease out to the best Bidder, for any Time not exceeding Three Years, the Tells payable as all the Bars, which now are, or shall be erected during such Lease, provided that the Proposers shall pay, or fecure to be paid, as much, or more than the Sum for which the Tolls are now Lett; and that Persons willing to take the fame, may deliver their Propofals in Writing, as the Place and Time aforefaid.

The faid Day is the Day appointed by Act of Parliament, for the Election of new Trustees, and other Officers.

OHN HOPKINS, Goldsmith, at the Golden Cup in Fleetstreet, near Fleet Bridge.

Name Hopkins under (as in the Margin)

WHO, to prevent the Decoys and Impositions the most wary are liable to in the Goldsmiths Way, from Publick SALES, AUCTIONS, &c. Way, from Publick Sales, Aversons, &c.
(a flocking forebode of the Defiruction
of Trade in general, and worthy there
fore an Attention of the Legislature) has
for more than Fifteen Years path, made it
his principal and chief Business to deal
in Second-Hand Plate, Watches, Jewels,
&c. and fill continues to to do, frietly observing the Method
he first begun with, of selling at the most reasonable Prices.

And the continual Call he has for large Quantities of va-rious Sorts of Second-Hand Plate, &c gives him an Oppor-tunity of affording most Money for the same; as does the very extraordinary Care he takes in employing the most expe-rienced and best Workmen, enable him to serve with New Plate, Watches, Jewels, &c. to the greatest Satisfaction.
